PROJECT PRESENTATION

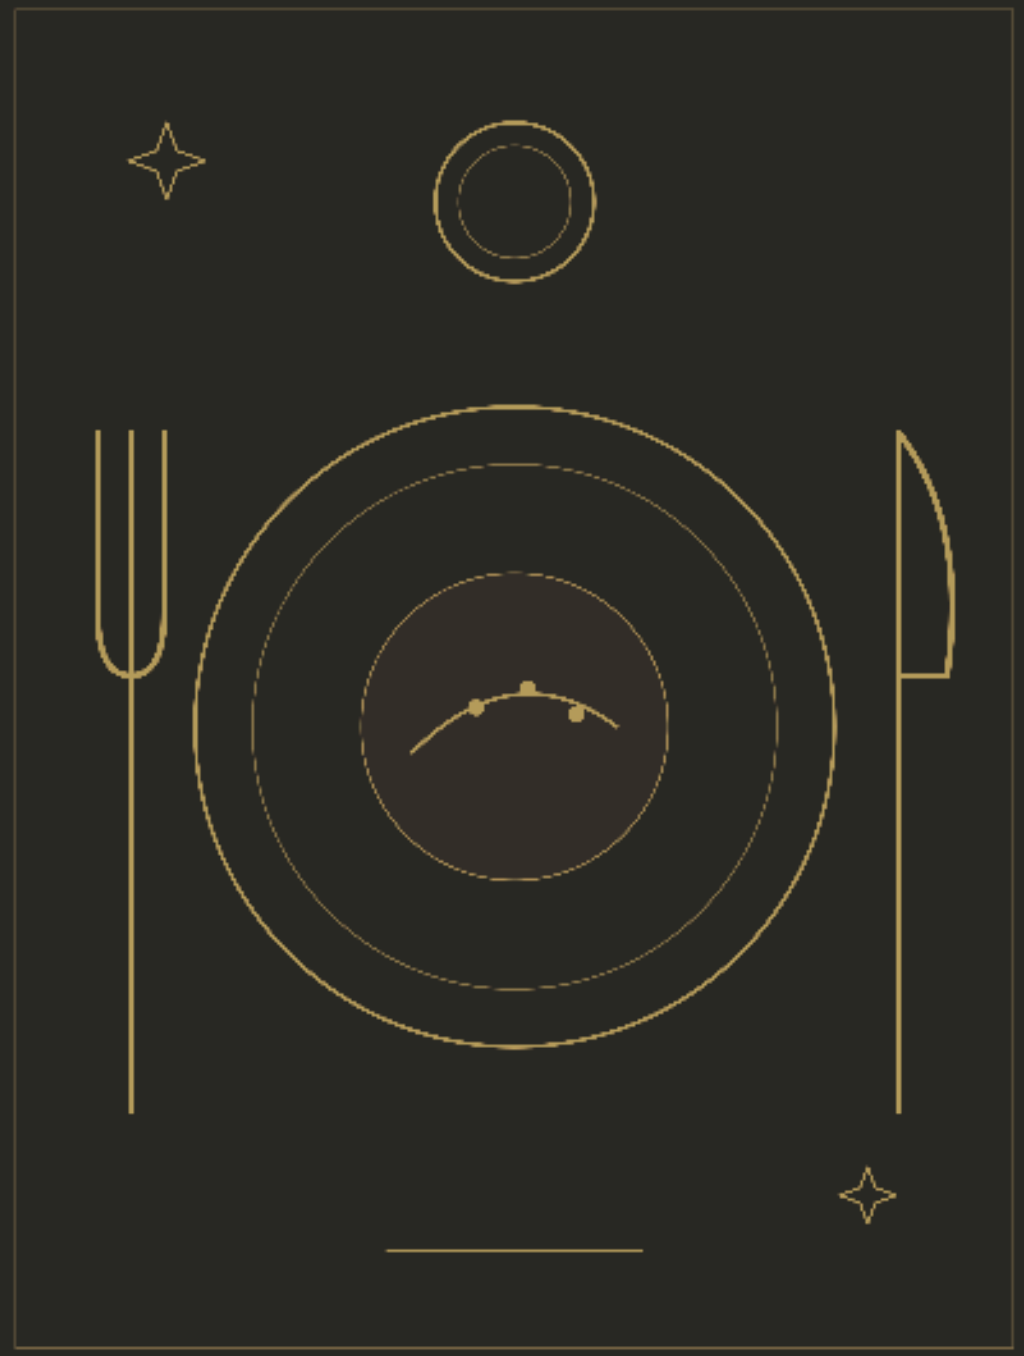

MAISON

Contemporary Dining Restaurant Website

Team Name: **Pixel Pirates**

Team Members: Aravindharaja R.I
Bhuvaneshwaran S
Santhos K

Course Name: UI/UX & Web Designing

ABSTRACT

Project Overview

PURPOSE

Maison is a modern restaurant website designed to provide an attractive and convenient online experience for customers.

Key Features

- Restaurant introduction and information
- Food menu with images, descriptions, prices
- Restaurant dining experience section
- Table reservation form
- Responsive user interface
- Simple navigation between sections

Project Objectives

01

Develop an attractive restaurant website

02

Present restaurant information clearly

03

Display food items with images, descriptions and prices

04

Provide a form for entering reservation preferences

05

Create a responsive layout for different screen sizes

06

Improve usability with clear navigation and visual design

Technology Stack

HTML5	Website structure and content
CSS3	Colors, typography, layout, spacing and responsive styling
Bootstrap Version 5.3.3	Responsive grid and reusable interface components
Bootstrap Icons Version 1.11.3	Icons for interface elements
Google Fonts	Playfair Display and DM Sans typography

Front-End Project

This is a front-end website. No backend, database, authentication system or payment gateway is implemented.

Website Modules

Home

- Restaurant branding
- Welcome message
- Navigation buttons

Restaurant Story

- Restaurant introduction
- Restaurant philosophy
- Supporting images

Menu

- Food images
- Names and descriptions
- Sample prices

Dining Experience

- Restaurant atmosphere
- Dining occasions
- Hospitality

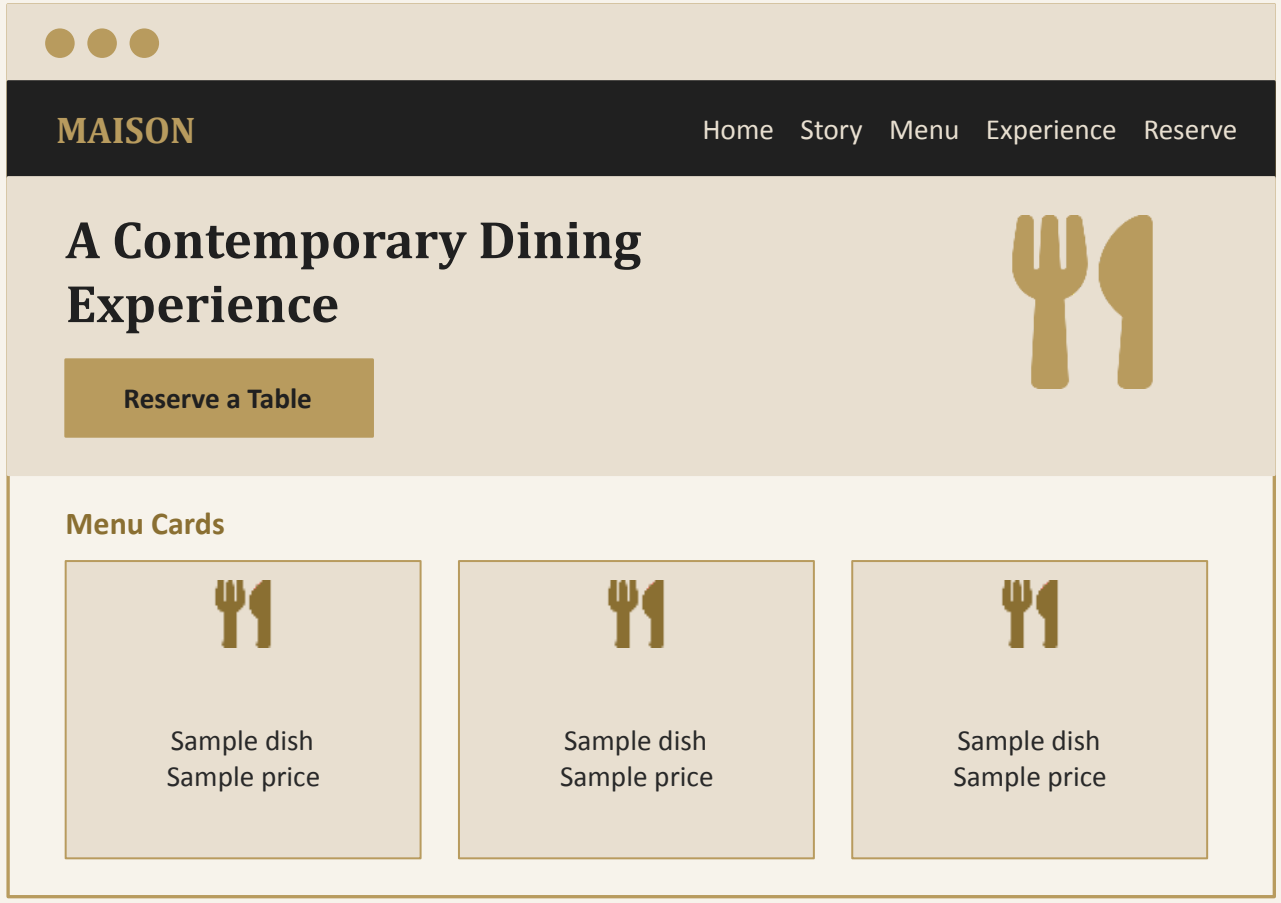

Reservation

- Name and email
- Date and time
- Number of guests
- Occasion and requests

Footer

- Navigation links
- Contact placeholders
- Social media icons

User Interface and Design

Illustrative mockup of the described design

Design Features

- Black, cream and gold palette
- Restaurant photography
- Serif headings, readable body text
- Consistent spacing and alignment
- Responsive grid layout
- Hover effects on cards and buttons
- Sticky navigation bar
- Mobile-friendly navigation

FEATURES

Website Features

- Navigation between website sections
- Restaurant information display
- Menu cards with sample prices
- Reservation form with preferences
- Interactive visual effects
- Responsive navigation and layout

Demonstration Note

The reservation form is a front-end demonstration. It does not send booking details to a server, store reservations in a database, or create an actual booking.

USER JOURNEY

Open Website → **Explore Restaurant** → **View Menu** → **Enter Reservation Details**

Conclusion and Future Scope

Conclusion

- Modern restaurant website interface
- Clear, organized information sections
- Sample menu items and prices
- Reservation form designed
- Responsive, interactive interface

Future Scope

- Integrate a backend
- Database to store reservations
- Administrator dashboard
- Real-time table availability
- Online payment functionality
- Real restaurant contact details
